Intuition Control Solo for WolfVision

The Ultimate User Experience in Visualizer Control

Overview

Intuition Control, with its patents-pending technologies, revolutionizes video conferencing and Visualizer control by offering an intuitive user interface. Intuition Control Solo (ICS) WolfVision delivers the ultimate user experience in controlling your WolfVision Visualizers.

ICS WolfVision gives you an instant return on your visualizer investment by creating an environment where you are no longer challenged by trying to understand how to operate your visualizer. With ICS WolfVision's intuitive and original user interface and sophisticated backend programming, all you need to know in order to connect to and control your visualizer is its IP address!

ICS WolfVision is for you, because it provides:

- **Higher adoption rates:** An intuitive, enjoyable and incredibly easy to learn system that makes users look forward to using their Visualizer.
- **Faster learning curve:** All Visualizers are controlled with the same system, which reduces training time dramatically, improves usability, and accelerates the return on your investment.
- **View real time images:** View real time image feed from your network connected Visualizer inside the Intuition Control application.
- **Natural experience:** By using touch and gesture control, users can interact with their Visualizer naturally.
- **E-mail feature:** Users can send the image on their screen in an e-mail directly from inside Intuition Control.
- **Flexible control device selection:** Choose from a variety of touch screen devices you can use to control your Visualizer: iPad, mobile phone, portable device, touch screen PC, Crestron panel and/or AMX panel.
- **Flexible control ports:** Control your Visualizer using your choice of available ports on the control device and the Visualizer: wireless network, cellular network, wired network, or serial port.
- **Portability:** Users can use Intuition Control to perform all available functions from anywhere in the world using network-based control.
- **Control using standard off the shelf control device:** You can use your existing supported hardware for Intuition Control or buy a new one from any of

the vendors, and mix and match the control device brands. There is no need to limit yourself to one brand of hardware.

ICS WolfVision v1.0.0.0 for iPad

- Control your Visualizer easily with an intuitive user interface
- Connect to your Visualizer via WiFi or 3G
- Stream live video
- E-mail images directly from your iPad
